# A LEADER

## in Steel Custom Fabrication

With **55+** years of experience in steel building manufacturing, U-Build Steel Buildings has grown to be a trusted source for custom fabrication across North America.

The **4 Core Pillars** of U-Build Steel Buildings :

### 1. HONESTY

While other companies may stretch the truth to make a sale, U-Build is committed to helping you get your project finished the way you intended.

### 2. Quality

U-Build understands how important a strong foundation is to success. We guarantee that our team will give your project the close attention to detail that it needs to become exactly what you envisioned.

### 3. MADE FOR YOU

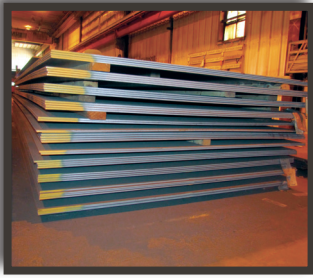

Whatever your needs may be, from aircraft hangars to personal workshops, U-Build will always be able to match you with the building you need.

### 4. RESULTS

Without our customers, U-Build could not operate. That's why we deliver on our promises, and we do it when you need it.

# STEEL CUSTOM FABRICATION PROCESS

## RAW

At U-Build, we use the highest quality steel when processing your product.

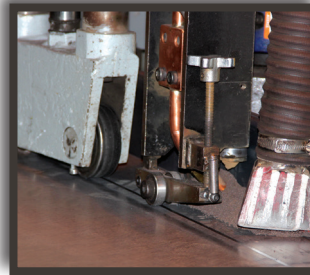

## FORMING

Using up-to-date machinery, we can form steel to meet any specifications you may have.

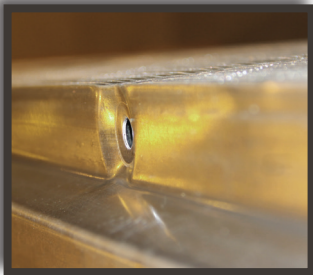

## CUTTING

Using our high-definition plasma torch, we can cut a wide-range of thicknesses to meet your needs.

## WELDING

With a team of skilled engineers and welders, we ensure your end-product meets your expectations.

## PUNCHING

Using the most cost-effective methods, we can create holes of many different shapes & sizes.

## FINISHED

U-Build provides logistical support until your finished product is received at its destination.

## COST-EFFECTIVE AND CUSTOMIZABLE

**U-Build** is committed to satisfying all of your steel requirements in the agricultural, Aviation, Equestrian, Self Storage, Warehouses & Workshop markets. We are very excited to meet our customers' expectations through the CUSTOM FABRICATION solutions. U-Build is able to provide the following services:

- Light gauge and plate steel processing (high-definition plasma cutting, punching, forming and welding),
- CNC Robotic Plasma Cutting (angles, channel, I-Beam, square, and rectangular HSS tubing),
- Welded Structural Fabrication,
- Logistic support across North America

# STEEL CUSTOM FABRICATION PROJECTS

## PAST PROJECTS

Our expertise in custom projects comes from years of design and development in our Manitoba factory. Our plant and staff are experienced in projects of all shapes and sizes, from aesthetic bridge fixtures to sky-high structural steel beams.

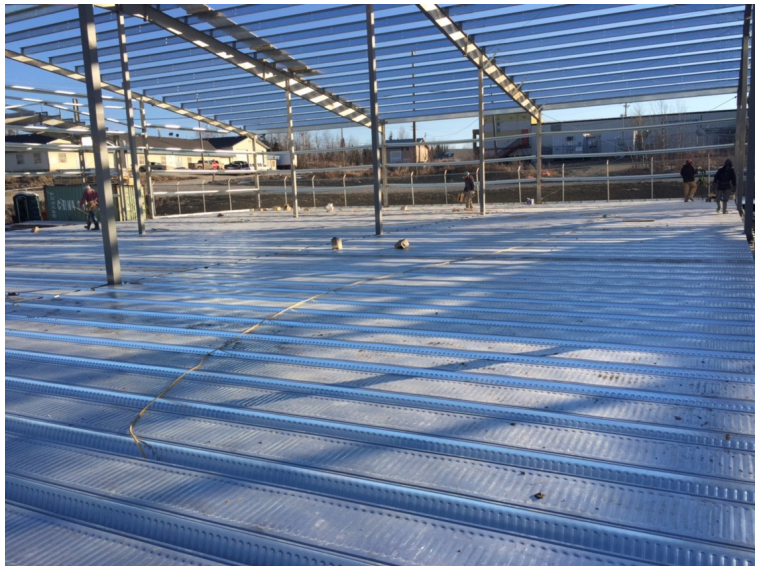

Some custom fabrication projects include:

- Suspended catwalks,
- Structural steel,
- Canopies,
- Customized beams,
- Skids,
- Raised platform structures.
